Field Service Engineer (m/f/d)

Do you enjoy working in a dynamic team?
Are you communicative and have an open, friendly manner?
With your team spirit, your success at BAB Engineering und Anlagenkennzeichnung GmbH is guaranteed!

We are a service provider for the national and international chemical, energy, pharmaceutical, and paper industries, with strong tradition, high quality standards, and a versatile product portfolio. We apply our solutions sustainably and responsibly to ensure efficient operational processes for our customers.

We are currently looking for a Field Service Engineer (m/f/d).

Your Responsibilities:

Recording and documenting actual vs. target status based on Piping & Instrumentation Diagrams (P&IDs) in process and plant systems

Maintenance and servicing of labeling points in industrial plants

Contact and coordination with customers

Implementation of escape route and safety signage

Understand and support customer process workflows

Your Profile:

- Completed technical trade training, preferably Electrician or similar
- (Career changers welcome!)
- Enjoy working with customers
- Reliability, motivation, and willingness to travel
- High quality and service orientation
- Driver's License Class B required

What We Offer:

Structured and professional onboarding

Work in a 4-day work week model

Responsible work with freedom to create solutions

Professional development opportunities

Above-average salary

Curious about us? Then apply now!

Mr. Niklas Monteiro Gracias looks forward to your application.
